STOR 151 Spring 2024

Lab 1: For Extra Credit

This is an "extra credit" lab using Excel. It is the first of three planned "labs" and if you complete all three you will earn up to 5 points extra credit which will be added to you course total before assigning finals grades for the course. If you choose not to do these labs, that is perfectly fine but in that case you won't earn the extra credit.

Instructions: please download the file "Lab1 Data Vizualizations.xlsx" from the "Files" directory within gradescope. The instructions are all contained within the lab and your submitted solution should be the completed excel file.

Due date: Thursday, March 7

The assignment will be graded as a single question with a total of 100 points.
